

ABSTRACT OF SANITARY REPORTS.

VOL. X. WASHINGTON, D. C., DECEMBER 6, 1895. No. 49.

TREASURY DEPARTMENT, *United States Marine-Hospital Service.*—Published in accordance with act of Congress approved February 15, 1893.

UNITED STATES.

Request of the State Board of Health of Florida for Extra Precautions at Habana.

EXECUTIVE OFFICE, STATE BOARD OF HEALTH OF FLORIDA,
Jacksonville, Fla., November 10, 1895.

SIR: On the 5th instant the State board of health of Florida, at a special meeting held in this city, amended a portion of the State quarantine regulations in regard to the disinfection and sterilization of baggage from foreign infected ports, which may be brought to any port in the State of Florida, and has made the regulation to apply to the winter months of the year equally with those of the summer. A copy of the amended rules has been forwarded to you, and it is now respectfully requested that you will issue such instructions as will insure the inspection of all passenger baggage in Habana after November 15 before leaving the harbor, and the designation of such as may be deemed suspiciously dangerous from infected localities in Habana or other Cuban ports.

The State board of health, being watchful of all causes which may operate to the detriment of the sanitary interest of the State and country, have considered that there is danger from introduction of yellow fever from Cuba during the winter months through infected clothing and baggage, the fomites of the disease lying dormant during the cool months to become active and virulent as the warmer days of spring and summer approach.

The board, thus impressed with the necessity of additional safeguards for health protection, also is of the opinion that the baggage of second-class passengers—usually Cuban operatives in tobacco—is peculiarly prolific of danger and therefore should be considered dangerous or suspicious, and should be designated by stamp or other device that can be readily recognized when the vessel arrives at any of the State quarantine stations. To accomplish this, your cooperation is respectfully

requested by necessary instructions issued to the proper officers of your Service, for which the State board of health will be duly appreciative.

Respectfully, yours,

W. B. HENDERSON,
President State Board of Health, Florida.

HON. SECRETARY OF THE TREASURY.

TREASURY DEPARTMENT,
OFFICE OF THE SUPERVISING SURGEON-GENERAL,
UNITED STATES MARINE-HOSPITAL SERVICE,
Washington, D. C., November 22, 1895.

SIR: I have to acknowledge the receipt of your letter of the 10th instant, relative to the advisability of the inspection of all passenger baggage leaving Habana after November 15, and requesting that such as may be dangerous from infected localities in Habana or other Cuban ports be designated.

In reply, I have to inform you that the precaution is considered a wise one at this time, and Sanitary Inspector Burgess, M. H. S., at Habana has been directed to inspect all luggage leaving Habana during the coming winter. He has been directed to label all luggage considered not dangerous with the red label bearing the words, "Inspected, passed," in large type, while all baggage which he considers requires disinfection will be labeled with the yellow label bearing the words, "To be disinfected."

Respectfully, yours,

WALTER WYMAN,
Supervising Surgeon-General M. H. S.

PRESIDENT STATE BOARD OF HEALTH OF FLORIDA,
Jacksonville, Fla.

[Reports to the Supervising Surgeon-General Marine-Hospital Service.]

Smallpox at Charleston, Mo.

CAIRO, ILL., *November 28, 1895.*

SIR: I have the honor to report the prevalence of smallpox at Charleston, Mississippi County, Mo., about twelve miles (by Iron Mountain Railroad) from this city. The mortality reported is small, and it is believed, from the sources of information open to this office, that the disease is under control.

Very respectfully, your obedient servant,

JAMES M. GASSAWAY,
Surgeon, U. S. M. H. S.

Smallpox in Wheeling, W. Va.

WHEELING, W. VA., *November 27, 1895.*

SIR: Since many exaggerated statements have been printed concerning smallpox in this city, I desire to present the facts. The disease was brought from Cincinnati last March. It spread and continued to prevail until about 100 cases had occurred, when the health officer resigned. Just at this time—September 7—a new outbreak occurred in a part of the city that had been free from the disease. I was elected health officer, and assumed charge September 8, with 14 cases on hand. Within a

few days we had 32 cases. This number has never been exceeded. The total reached since my election is 69. Of these, 13 were in one family connection. Nine deaths have occurred, all of persons never vaccinated—26 per cent. Not a single case has occurred in a person vaccinated this year. But one severe case has occurred among the patients who were ever successfully vaccinated.

We now have 2 patients in the hospital. Not a case in the city, unless concealed.

Very respectfully,

S. L. JEPSON,
Health Officer.

No New Cases of Smallpox at Nogales, Ariz.

NOGALES, ARIZ., November 25, 1895.

SIR: I have the honor to inform you that no new cases of smallpox have occurred in this vicinity since last report.

Very respectfully,

W. F. CHENOWETH,
Sanitary Inspector, M. H. S.

Scarlet Fever in Cairo, Ill.

CAIRO, ILL., November 28, 1895.

SIR: I have the honor to report the appearance of scarlet fever at this place. The cases seen by myself, and of which information has been obtained from practitioners of the city, have been so mild in form that doubt has been felt in a number of them. Four cases have occurred in the family of the medical officer in command, and are now either convalescing or proceeding satisfactorily.

Very respectfully, your obedient servant,

JAMES M. GASSAWAY,
Surgeon, U. S. M. H. S.

Sanitary Condition of Cumberland, Md.

CUMBERLAND, MD., November 30, 1895.

SIR: The month of November has been one of unusual healthfulness in this section. There has been a remarkable freedom from contagious diseases. Diphtheria, which had been for several years severe and fatal, has been less prevalent and less severe. Antitoxine has brought the mortality down to less than any other of the serious affections of childhood. It has proven especially useful in laryngeal diphtheria, which was our most fatal disease until the introduction of this remedy. Scarlet fever has been mild, and there have been but few cases and but 1 death this autumn. Typhoid fever is prevailing up the Potomac River, in West Virginia, to some extent, but we have only had a moderate number of cases and very few deaths.

Pulmonary phthisis claims about the usual number of fatalities for the month.

I believe the unusual dryness of this section has promoted the healthfulness of the fall months, as our autumn and winter affections are chiefly of the respiratory passages.

I regret I am unable to furnish figures, but cheerfully send this report.

Respectfully,

E. T. DUKE, M. D.

Reports of States and Yearly and Monthly Reports of Cities.

FLORIDA—*Tampa*.—Month of October, 1895. Estimated population, 21,000. Total deaths 29, including phthisis pulmonalis, 3, and enteric fever, 1.

ILLINOIS—*Belleville*.—Two weeks ended November 23, 1895. Estimated population, 20,000. Total deaths, 5. No deaths from contagious diseases.

IOWA—*Boone*.—Month of October, 1895. Estimated population, 8,345. Total deaths, 7, including 2 from enteric fever and 2 from diphtheria.

Cedar Rapids.—Month of October, 1895. Estimated population, 24,000. Total deaths, 20, including diphtheria, 6; enteric fever, 2, and phthisis pulmonalis, 1.

Council Bluffs.—Month of November, 1895. Estimated population, 35,000. Total deaths, 20, including diphtheria, 1; scarlet fever, 1, and phthisis pulmonalis, 2.

Creston.—Month of October, 1895. Estimated population, 10,000. Total deaths, 3, including phthisis pulmonalis, 1.

Davenport.—Month of October, 1895. Estimated population, 31,179. Total deaths, 37, including phthisis pulmonalis, 5; diphtheria, 4, and whooping cough, 1.

Des Moines.—Month of October, 1895. Estimated population, 82,674. Total deaths, 59, including phthisis pulmonalis, 3; enteric fever, 3; diphtheria, 4.

Dubuque.—Month of October, 1895. Estimated population, 40,000. Total deaths, 36, including phthisis pulmonalis, 5; enteric fever, 3; and diphtheria, 7.

Eddyville.—Month of October, 1895. Estimated population, 1,000. No deaths from contagious diseases.

Eldon.—Month of October, 1895. Estimated population, 1,900. Eight deaths, including diphtheria, 1.

Glenwood.—Month of October, 1895. Estimated population, 1,000. Total deaths, 5, including enteric fever, 1, and phthisis pulmonalis, 1.

Keokuk.—Month of October, 1895. Estimated population, 14,287. Total deaths, 17, including 2 from phthisis pulmonalis.

Oskaloosa.—Month of October, 1895. Estimated population, 8,551. Total deaths, 5, including 1 from phthisis pulmonalis.

Ottumwa.—Month of October, 1895. Estimated population, 16,761. Total deaths, 18, including phthisis pulmonalis, 3; enteric fever, 3, and diphtheria, 1.

MICHIGAN.—Week ended November 23, 1895. Reports to the State board of health, Lansing, from 55 observers indicate that erysipelas and inflammation of kidney increased, and typhoid fever, remittent fever, intermittent fever, and diarrhea decreased in area of prevalence. Phthisis pulmonalis was reported present during the week at 187 places, enteric fever at 79, scarlet fever at 38, diphtheria at 35, measles at 5, and smallpox at 3 places—Detroit, Rochester, and Three Rivers.

NORTH CAROLINA.—Month of October, 1895. Reports to the State board of health from 29 towns, having an aggregate population of 139,485 (white, 80,522; colored, 58,963), show a total of 222 deaths (white, 90; colored, 132), including phthisis pulmonalis, 32; enteric fever, 11; scarlet fever, 1; diphtheria, 2; and whooping cough, 1.

TENNESSEE.—Month of October, 1895. Reports to the State board of health from 6 cities and towns, having an aggregate population of 200,579, show a total of 372 deaths (white, 191; colored, 181), including phthisis pulmonalis, 53; enteric fever, 13; scarlet fever, 1; diphtheria, 9; and whooping cough, 2.

VERMONT.—*Burlington*.—Three months ended October 31, 1895. Estimated population, 14,590. Total deaths, 83, including phthisis pulmonalis, 6; scarlet fever, 9; diphtheria, 1; and croup, 1.

Cholera Notes.

[Translated in this Bureau from the "Veröffentlichungen des Kaiserlichen Gesundheitsamtes," Berlin, November 13, 1895.]

Austria-Hungary—Galicia.—From October 29 to November 4, 66 cases and 41 deaths were reported. Of these, 2 cases, 1 death occurred in the city of Tarnopol; in 5 localities of the district of Tarnopol, 15 cases, 10 deaths; in 6 communes of the district of Trembowla, 20 cases, 10 deaths; in 2 communes of the district of Czortkow, 2 deaths; in Charastkow, in the district of Husiatyn, 8 cases, 7 deaths; and in Radziechow, in the district of Kamionka Strumilowa, 15 cases, 11 deaths.

France.—From October 27 to November 2, 1 case of choleric form affection was reported in Paris.

Russia.—Cases and deaths were reported to the medical department, up to October 12, as follows: From September 15 to 21, and September 22 to 28, in the government of Volhynia, 2,330 cases, 903 deaths, and 1,919 cases, 798 deaths, respectively; in the government of Kiew, 16 cases, 3 deaths, and 41 cases, 18 deaths, respectively; in the district of Podolia, 28 cases, 15 deaths, and 9 cases, 3 deaths, respectively; on the coast of Siberia, from September 18 to 24, 8 cases, 11 deaths, and from September 25 to 30, 2 cases, 1 death.

Advices of November 6 state that 4 cases have appeared at Wiborg, in Finland.

Egypt.—Cases and deaths are reported as follows: In Damietta, from October 23 to 28, 8 cases, 6 deaths; in Menzaleh, from October 22 to 24, 18 cases, 22 deaths; in Matarieh, near Menzaleh, from October 20 to 24, 18 cases, 22 deaths; in El Kordi, from October 23 to 27, 5 cases, 6 deaths; in Seneita, from October 26 to 27, 12 cases, 4 deaths; in Bousrate, on October 25, 4 cases, 4 deaths; in Gheit el Nassara, on October 27, 1 case; in Ahmadiéh, on October 24, 22 cases, 10 deaths; in Mansourah, on October 25, 1 death; on October 29, 6 new cases.

Morocco.—According to advices from Tangier of November 3, no new cases have occurred since October 29.

East Indies—Calcutta.—From September 15 to October 5 there were 81 cholera deaths.

Current Quarantine Measures.

[Translated in this Bureau from the "Veröffentlichungen des Kaiserlichen Gesundheitsamtes," Berlin, November 13, 1895.]

CHOLERA.

Austria-Hungary.—The maritime authorities of Finnel have ordered the regulations of the Dresden conference to be applied to arrivals from Egypt.

Spain.—By royal proclamation of November 2, quarantine is ordered for arrivals from Bangkok, Nagasaki, Yokohama, and Hawaii. All ports situated not more than 165 kilometers from these localities are declared suspect. Quarantine against vessels arriving from Singapore and Shanghai, under normal conditions, is suspended.

Portugal.—The Government journal publishes a ministerial declaration to the effect that Singapore is to be considered a clean port.

YELLOW FEVER.

Spain.—A royal proclamation of November 2, orders quarantine for all arrivals from ports on the east coast of Mexico and Guatemala.

Portugal—The Government journal publishes a ministerial declaration to the effect that the port of Pernambuco is infected, and that other ports in the same province are to be considered suspect.

CUBA.

Yellow Fever on Board British Schooner Boniform at Habana.

HABANA, CUBA, November 25, 1895.

SIR: The British schooner *Boniform*, which I informed you had left for Canning, Nova Scotia, with the captain sick with yellow fever aboard, I have now the honor of informing you that instead of entering a port in the United States in distress as I predicted she might, returned here in distress the next day after leaving, and her captain (Potter) died in a short time after his vessel reentered this port. The vessel is still here.

Very respectfully,

D. M. BURGESS,
Sanitary Inspector, M. H. S.

In re Certain Spanish Steamships Arriving at Southern United States Ports from Cuba.

[See previous letter from Dr. Caminero, published in ABSTRACT dated November 8, 1895.]

SANTIAGO DE CUBA, November 23, 1895.

SIR: In answer to your letter of November 5, I have the honor to inclose the lists of the three lines of steamers plying between the ports of Liverpool, some Spanish and Cuban ports, and some of the southern ports of the United States, especially New Orleans, said vessels never taking bills of health from this port.

Respectfully,

Dr. HENRY S. CAMINERO,
Sanitary Inspector, M. H. S.

[Inclosure.]

Names of vessels belonging to the Bandera Espanola line plying between the ports of Liverpool, some ports of Spain, Island of Cuba, and some of the southern ports of the United States: Navano, Madrileno, Santanderino, Gaditano, Gallego, Euskaso, Palestino.

Agents in Santiago de Cuba, Branet & Co.

Names of vessels of the Flecha and Serra line plying between the same ports as those mentioned before: Ernesto, Hugo, Enrique, Pedro, Guido, Serra, Carvlina, Leonora, Alicia, Francisca, Vivina, Benita, Sofia, Gracia, Elvira.

Agents in Santiago de Cuba, Brooks & Co.

Names of vessels of the Larrinaga line plying between the same ports as mentioned before: Alava, Buenaventura, Emiliano, Niceto, Ramon Larrinaga, Saturnina.

Agents in Santiago de Cuba, Branet & Co.

EGYPT.

Status of Cholera in Egypt.

ALEXANDRIA, EGYPT, November 15, 1895.

SIR: Inclosed I send you the latest statistics of the cholera.

The cholera returns for only 3 infected centers were issued yesterday. At Damietta 2 new cases were admitted to hospital, and there were no deaths at Ezber el Borg; 1 new case and 2 deaths were registered at Mansourah; 1 sick person remains in hospital. The total number of cases registered up to yesterday morning was 759, including 604 deaths.

I remain, sir, yours, faithfully,

J. F. LOVE.

[Inclosure.]

Cholera in Egypt.

MEXICO.

One Case of Smallpox in Nogales.

CONSULATE OF THE UNITED STATES,
Nogales, Sonora, Mexico, November 18, 1895.

SIR: I have the honor to inform you that there is a case of smallpox in this town of Nogales, which the sanitary officer, who has it in charge, pronounces as one of an unusually virulent type. I will notify the Federal sanitary officer at Nogales, Ariz., of the same, so that he may take measures to prevent, if possible, the introduction of the disease into the American portion of this International community.

I am, sir, your obedient servant, FRANK W. ROBERTS,
United States Consul.

HON. ASSISTANT SECRETARY OF STATE.

STATISTICAL REPORTS.

AUSTRALIA—*New South Wales.*—*New Castle.*—Month of September, 1895. Estimated population, 15,329. Total deaths, 22, including 1 from diphtheria.

Queensland—Brisbane.—Month of September, 1895. Estimated population, 93,657. Total deaths, 78, including diphtheria, 2; and whooping cough, 5.

BAHAMAS—*Dunmore Town.*—Two weeks ended November 21, 1895. Estimated population, 1,472. One death. No death from contagious disease.

Governors Harbor.—Two weeks ended November 23, 1895. Estimated population, 1,195. No deaths.

Green Turtle Cay—Abaco.—Two weeks ended November 21, 1895. Estimated population, 3,900. No deaths.

CUBA—*Habana.*—Under date of November 30, 1895, the United States sanitary inspector reports as follows:

There were 107 deaths in this city during the week ending November 28, 1895. Nine of those deaths were caused by yellow fever, with 20 new cases, approximately; 6 were caused by enteric fever, 1 by paludal fever, 8 by enteritis, 1 by smallpox, 3 by pneumonia, and 1 by glanders.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 33 great towns of England and Wales during the week ended November

16, correspond to an annual rate of 19.1 a thousand of the aggregate population, which is estimated at 10,591,530. The lowest rate was recorded in Huddersfield, viz, 10, and the highest in Liverpool, viz, 30.8 a thousand.

London.—One thousand five hundred and ten deaths were registered during the week, including measles, 77; scarlet fever, 14; diphtheria, 61; whooping cough, 21; enteric fever, 23; diarrhea and dysentery, 25. The deaths from all causes corresponded to an annual rate of 19.5 a thousand. In greater London 1,901 deaths were registered, corresponding to an annual rate of 16.4 a thousand of the population. In the "outer ring" the deaths included 11 from diphtheria, and 7 from measles.

Ireland.—The average annual death rate represented by the deaths registered during the week ended November 16 in the 16 principal town districts of Ireland was 22.4 a thousand of the population. The lowest rate was recorded in Armagh, viz, 7, and the highest in Sligo, viz, 50.8 a thousand. In Dublin and suburbs 155 deaths were registered, including enteric fever, 2; smallpox, 2.

Scotland.—The deaths registered in 8 principal towns during the week ended November 16 corresponded to an annual rate of 18.5 a thousand of the population, which is estimated at 1,500,435. The lowest mortality was recorded in Leith, viz, 14.2, and the highest in Greenock, viz, 26.8 a thousand. The aggregate number of deaths registered from all causes was 535, including smallpox, 1; scarlet fever, 9; measles, 5; diphtheria, 5; and whooping cough, 18.

St. Helena.—Three weeks ended October 26, 1895. Estimated population, 3,686. Total deaths, 4. No deaths from contagious diseases.
